THE CAUSE

The Dothan Area Botanical Gardens, located in SE Alabama, at 5130 Headland Avenue, just off U. S. Hwy 431 N, consists of 50 acres of cultivated gardens, nature trails and undeveloped, wooded landscape. The DABG seeks to preserve the native plants of the area in an attractive balance with traditional botanical garden elements. Founded in July 1991 with construction beginning in 1995, the Gardens have developed steadily under the leadership of an all-volunteer Board of Directors, which is committed to the conservation of

natural resources for future generations. Mr. Ralph Smith was an ardent supporter of the DABG from its very inception, having served on the Board up until his death. Over that time he held various officer positions and served on numerous committees. His managerial

experience and cool demeanor was invaluable as the Gardens grew. At times Ralph and his devoted wife, Carolyn, personally stepped in to keep the Garden dream alive. This support never wavered as virtually every major project at the Gardens had Ralph's handprint somewhere on it. Fittingly, this devotion was recognized in 2011 with the naming of the new building which, as usual, he played such a large part of the "Ralph and Carolyn Smith Botanical Center".

The Gardens Mission is to provide an enhancement to the quality of life for Wiregrass citizens, to serve as an educational resource for children and adults in garden lore and environmental issues, and to be a vibrant area attraction that promotes tourism and economic development in southeast Alabama.

RALPH SMITH
